Subject: MODIFICATION OF BUILDING 344 - ELMER

Gentlemen:

Reference is made to Robert H. Campbell's letter J-16465, subject as above, dated March 9, 1953.

You are hereby authorized to initiate design and to prepare estimates of the work requested in Mr. Campbell's letter. Cost estimates will be prepared similar to the original work at the CNR area. In other words, your estimate will include only the work performed or materials furnished by Holmes & Narver. The estimate will then be in two parts: (1) building addition, and (2) installation of equipment. Part (1) will be charged to Plant and Equipment, and Part (2) will be charged to Support Services.

Very truly yours,
